

DIEGO MIRALLES

CHEMICAL ENGINEERING STUDENT | INDUSTRIAL PLANT EXPERIENCE

Elche, Alicante, Spain | diegomirallespomares@gmail.com | github.com/Diego-Miralles

PROFILE

Second-year Chemical Engineering student at the University of Alicante with hands-on experience in a chemical production environment. Strong foundations in material and energy balances, thermodynamics and process analysis, supported by practical work with DWSIM, MATLAB and Excel. Safety-conscious, analytical and motivated to contribute to an international internship in process engineering, chemical manufacturing or the pharmaceutical industry.

EDUCATION

BSc in Chemical Engineering | University of Alicante | Alicante, Spain | 2024 - Present

- Second-year student; completed all first-year subjects.
- Relevant coursework: material and energy balances, thermodynamics, physical chemistry, organic chemistry, mathematics and physics.

INDUSTRIAL EXPERIENCE

Chemical Plant Operator | Químicas Sanz | Spain

- Supported day-to-day activities in a chemical production environment, gaining hands-on exposure to industrial processes and plant equipment.
- Followed established operating procedures and occupational safety requirements in a safety-critical setting.
- Worked alongside plant personnel to support safe, orderly and efficient operations.
- Built practical awareness of chemical manufacturing workflows and the importance of procedural compliance, teamwork and attention to detail.

TECHNICAL PROJECT

Chemical Process Simulation | DWSIM | Personal academic project | 2026

- Developing a process simulation and assessing streams, phase behaviour, temperature changes and energy requirements.
- Applying material and energy balances, comparing operating scenarios and documenting key process indicators in Excel.
- Building practical experience in engineering analysis and structured technical documentation beyond university coursework.

TECHNICAL SKILLS

Process engineering: Material and energy balances; thermodynamics; process analysis; basic process simulation; industrial process awareness

Software and data: DWSIM; MATLAB; Microsoft Excel; Microsoft Office; Git and GitHub (developing proficiency)

Safety and documentation: Safety-conscious working; technical documentation

Professional strengths: Analytical problem-solving; teamwork; attention to detail; communication; adaptability; rapid technical learning

LANGUAGES AND CAREER INTERESTS

Languages: Spanish (native); Valencian (C1); English (B2); German (A2, progressing towards B1)

Career interests: Process engineering; chemical manufacturing; pharmaceutical industry; process simulation; international internships
